Working Student (m/f/d) Project Management Support

Requisition ID: 34036

Contact: Lea Kindt, +49 40 73675138

Job Description

At Semikron Danfoss we develop customer specific power electronics for automotive and industrial applications. To realize our fast growth, we are currently looking for a **Working Student (m/f/d) Project Management Support** at our **Flensburg** office to join our team. In this role you will support our team with project managers and the PMO.

Job Responsibilities

Your tasks in this role will include the support of the project managers on topics like data collection, resource overview and budgets. Besides that, you will work together with the PMO in topics like organizational development, IT system support, and prepare presentations.

Background & Skills

Our team is willing to give you a structured and well-organized onboarding once you joined Danfoss.

For this position, you are an enrolled as a student within engineering, natural sciences (e.g. physics) and/or in business paired with a technical affinity to electronics or any other relevant field.

Additionally, we are looking for:

- Passionate attitude with drive for results
- Well-organized and have a hands-on approach
- Proficient skills in MS Office
- Fluent English language skills, German skills are a plus

As a working student (m/f/d) you will work up to 20 hours per week with a schedule that largely considers the requirements of your studies. You are welcome to work for several semesters. We offer you appropriate remuneration and the opportunity to gain your first practical insights into everyday working life in parallel to your studies.
